PROFESSIONAL SUMMARY

B.Tech Computer Science student with hands-on experience in Machine Learning, NLP, Generative AI, Data Analytics, and Python-based application development. Experienced in building end-to-end ML pipelines, AI-powered applications, REST APIs, and data-driven dashboards using Python, Scikit-learn, Pandas, NumPy, Flask, SQL, and Power BI. Strong foundation in DSA, DBMS, OOP, statistics, and software engineering.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS

Machine Learning & AI: Scikit-learn, NLP, Recommendation Systems, Classification, Regression, Predictive Modeling, Model Evaluation, Prompt Engineering, Generative AI, TensorFlow (Basic)

Data & Analytics: Pandas, NumPy, Power BI, Data Cleaning, EDA, Statistical Analysis, Feature Engineering, Data Visualization

Development: Flask, Django, REST APIs, Git, GitHub, Debugging, Testing, SDLC, Agile

Databases: MySQL, SQLite

Core: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, Statistics

PROJECTS

RevenuePilot: AI-Powered E-commerce Platform

AI+Full-Stack Project

- Developed an AI-focused revenue management and analytics application designed to support data-driven business decisions.
- Built application workflows for revenue analysis and management with a focus on usable, decision-oriented insights.
- Implemented a responsive web interface and backend functionality to streamline revenue-related tracking and analysis.

VibeSync – Music Recommendation System

Full Stack + AI

- Developed a full-stack AI application using Python, Flask, NLP, and Machine Learning to recommend music based on users' moods.
- Built an end-to-end ML pipeline with Pandas, NumPy, and Scikit-learn covering preprocessing, feature engineering, model evaluation, and Flask deployment.
- Performed exploratory data analysis to identify listening patterns and improve recommendation quality; integrated Flask REST APIs and SQLite for real-time recommendations.

SpamShield – Email Spam Detection System

Full Stack + AI

- Developed an NLP-based spam classification system using text preprocessing, TF-IDF vectorization, feature engineering, and Scikit-learn.

- Trained and evaluated ML models using Accuracy, Precision, Recall, and F1-score.
- Built Flask REST APIs for real-time spam prediction and deployed the application.

Farmify – Farm Management System

Full Stack Project, Role: Frontend Developer

- Developed responsive interfaces using HTML, CSS, and JavaScript and integrated weather APIs using Node.js for crop planning and farm management.
- Managed structured data using MongoDB and designed interactive dashboards to improve usability.

EXPERIENCE

Sorice Solutions

May 2025 – June 2025

Software Developer Intern

- Developed an NLP-based Email Spam Detection application using Python, Flask, and Scikit-learn.
- Handled data preprocessing, feature engineering, exploratory data analysis, and model evaluation; built REST APIs for real-time inference and deployed the solution using Flask.
- Collaborated through Git and improved application performance through debugging and testing.

Meta Scifor Technologies Pvt. Ltd

June 2025 – Sept 2025

Python Developer Trainee

- Developed backend applications using Python, Flask, and Django following SDLC best practices.
- Built RESTful APIs, CRUD modules, and SQL database integrations; optimized applications through debugging, testing, and code enhancements.
- Collaborated using Git for version control and team-based development.

EDUCATION

Vellore Institute of Technology, Aug 2023 – May 2027

B.Tech in Computer Science and Engineering, CGPA: 8.42

City Montessori School, Lucknow, March 2023

Class XII, 91.25%

City Montessori School, Lucknow, March 2021

Class X, 97.2%

CERTIFICATIONS

- Software Engineering – HackerRank
- Python for Data Science, AI and Development – IBM
- Introduction to Generative AI – Google Cloud
- AI for Beginners – HP Life
- Analysis and Visualization of Data with Power BI – Microsoft
- Workshop on Artificial Intelligence – Techkriti'24, IIT Kanpur
- Graph Theory Programming Camp – AlgoUniversity

ACHIEVEMENTS

- Top 75 Teams out of 950+ teams – Smart India Hackathon
- Solved 100+ problems on LeetCode

- Part of the Marketing Team of The Music and Band Club, contributing to marketing and promotion of musical events.
- Served as the Content Team Member of the Vitera Club, contributing to content creation and social responsibility initiatives.
- Volunteer for the Cognizant Placement Drive, assisting in organizing and coordinating placement-related activities.
